## 1. Executive Summary

The following is an executive summary of the Report submitted by ArcDH on the protests in 2022/3 against mandatory hijab.

The evidence is overwhelming that the protests to mandatory hijab in the Islamic Republic of Iran in the autumn/winter 2022 and early months of 2023, emerged spontaneously, were the actions of the vulnerable groups with internalised sentiment. They comprised the following groups:

1. Women, who have been subjected to the extreme forms of deprived rights.
2. The youth, who have no hope for the future and are lurking in despair and destitute.
3. The minority nations, whose rights are continuously marginalised by Iranian authorities.

Although protests were country-wide, the Baluchis, Azerbaijanis, Arabs, Kurds, Lurs, Qashqays, Turkmens and other nations displayed their own trend, traits and red lines. We can outline general trends for all the minority nations but each of them nation may speak for themselves. Below are salient features displayed by Azerbaijanis. As soon as protests broke out in Karaj, the Iranian repressive machinery was out in action, as summarised below:

- The authorities enforced an undeclared curfew throughout Azerbaijani cities (Tabriz, Urmia, Ardabil and Zanjan) at night times after Karaj protests; and governed by fear using special forces, paramilitary units and plainclothes agents.
- Protest breakouts were made nearly impossible in Azerbaijani cities but security agents rounded up 1700 individuals in early days from their house in Tabriz alone.
- Our reported ballpark figures indicated some 3000 Azerbaijani individuals were rounded up at initial dates and were subjected to rough justice of the Iranian special and paramilitary units.
- We have compiled 761 names in the Report, of whom we note the following:
  - As many of 45 individuals have suffered nearly a total of 114 years of imprisonment sentences.
  - Some 9 individuals have been identified to be at the risk of capital punishments.
  - At least, 40 Azerbaijani individuals have suffered extrajudicial deaths;
  - Some 7 Azerbaijani lawyers have been prosecuted.
  - Those maimed by direct bullet hits avoided hospitals treatment for the fear of being arrested in hospitals; no specific information, other than anecdotal individual cases.
  - We were not at liberty to disclose the individuals who suffered indecent acts and rapes.
  - Sentences of a significant number of these individuals include heinous acts of flagging, being banned from travelling to foreign countries, banishment to far-flung parts of the country outside Azerbaijani provinces normally with harsh climatic conditions.
  - banning from their normal practices or their university courses or publishing in social media.
- The authorities falsify carefully records on detainees and extrajudicial deaths.
- The victim families are forced to issue false statements; the bodies of murdered individuals are only returned to their families by paying ransom to the authorities or complying with the Iranian authorities by denying the role of the Iranian authorities in the murder of their loved ones.

There are many cynical acts by the Iranian authorities in Azerbaijani provinces but their use of the prisoners' dilemma is the most dreadful one with the intension of inflicting fear, suspicion and distrust among Azerbaijani activists. They also make deals with less informed activists to be set free, should they give written undertaking for not becoming an activist or a protester in the future. In this way, the authorities make a mockery of Universal Human Rights Declaration by infringing on the most basic human rights of Azerbaijanis.

---

At the tail-end of the protests, we started to witness a new phenomenon: poisoning female students at their schools to deter them from education, as a measure preserving hijab and pressing their ideological dogma that the place of women is their home, not schools or offices. The first act of poisoning took place in Qom on 30 November 2022 and by early March 2023, it was widespread to the extent that the Ministry of Health stated that 13,000 students were treated by then. The Iranian authorities put restrictions on the news but social media acted as the remaining source of information. Such exposures in Azerbaijani provinces have been reported widely in social media and include the cities and towns, e.g., Ardabil, Zanjan, Maragha, Urmia, Khoy, Ushnov and Tabriz. It is important to note that the Iranian authorities have not denied it but accuse others of inflicting the acts; also, they have done nothing effective to find the culprits.

## 2. Integrated Information

The governance in the Islamic Republic of Iran displays no effective knowledge of vulnerable groups in policymaking in its modern sense but is minded with the charity for ‘mostazafan’. However, mostazafan are a subject of charity and the Iranian authorities took subservient religious mostazafan under their arm and protected them for their subservience, at the expense of any other vulnerable groups. Over time, a diverse range of other vulnerable groups were neglected, who internalised their grievances. Their internalised sentiments and grievances were like tinder awaiting a spark. Harsh mandatory hijab was just that the spark and the neglected vulnerable groups were those tinderboxes, exploded everywhere and in more 30 cities in Azerbaijani provinces. The important thing is that the manner of the Iranian authorities in dealing with the protests has given rise to the multiplication of the vulnerable individuals. The situation now is even worse. Let us see what the Iranian authorities did in Azerbaijani provinces? These are outlined below for the period from the mid-September 2022:

- Miss *Hadis Najafi* and her associates in Karaj organised a callout for a protest and this was announced in her social media pages with more than half a million followers. The protest was against the mandatory hijab policies in support of innocent victims.
- The vulnerable groups, including women, the youth and minority nations, spontaneously joined the protests with snowball effects.
- As soon as the strength of the countryside protests became clear and of a revolutionary proportion, minority nations displayed their character, some resorted to armed struggle, but Azerbaijanis were minded by pressing their brand: the *struggle without losing life*.
- The protests in Azerbaijani provinces; reaffirmed that they were founded on human rights of the individuals, and national rights of the nation of Azerbaijan in Iran.
- The authorities enforced an undeclared curfew throughout Azerbaijani cities and town, particularly at night times creating an atmosphere of fear.
- The Azerbaijani cities were militarised from the very early stages in mid-September 2022 by the presence of special forces, paramilitary units and plainclothes agents hovering over the city centres.
- These forces rounded up cultural and environmental activists. We still do not know their numbers in detail, but their ballpark figures are outlined below.
- Plainclothes security agents were seen to set fire to buildings in central quarters of Azerbaijani towns to prepare the ground for arresting activists and protesters and accusing them of these arson attacks.
- The Iranian authorities also resorted to extrajudicial killings and rounding up individuals and Azerbaijani activists and put every effort to falsify the records on detainees and extrajudicial deaths.
- The Iranian authorities pressurised the families for false confessions and put the condition of obtaining the body of the murdered victims when the family members were obliged. This cynical practice has been going on for a long time and is not a new invention but this time implemented with a higher vigour.
- Iranian authorities were swift to cut the internet and to prosecute social media activists.
- The acts of arrests in the streets were normally brutal associated with violence to inflict fear and wreaked havoc by shooting at the vulnerable and civilians.
- The arrest of the Azerbaijani activists normally took place in their houses, where the searches were associated with wrecking the house, beating up and intimidating family members, particularly the children and the elder, and confiscating personal items. These raids were

normally without any court order and the entries to the houses were forced entries through the walls and rarely by the doors, to maximise the fear.

- The arrested individuals were not normally given the right of access to any lawyer, let alone the lawyer of their choice.

Notably, when Mrs. Rumina Rahmani (See the individual No 258) was being arrested in Melikkendi (Malekan), she was with her 2-month-old baby and then she was separated from her child when transferred to solitary confinement in Maragha prison. Later on, we have not heard of the case outcomes in recent months.

- During the detention periods, the detainees are not normally given the right of telephone call to their families, or the access to any lawyer, let alone the lawyer of their choice.
- They were implied with the threat of being accused of spying.
- Their file cases are normally full of what the victim *must have done* rather than *what they have done*.

Our ballpark figure for the early stage of detentions of Azerbaijanis suffering arbitrary acts of the Iranian authorities are based on the following:

- Based on the information by an Azerbaijani human rights lawyer, more than 1700 individuals were detained in Tabriz alone.
- 300 individuals were rounded up in Tabriz University in October 2022.
- Based on a quote by HRANA, some 500 protesters were detained in Ardabil, of which some 150 were reportedly released on bail.
- Some 200 individuals were in detention by 15 October 2022 in Abhar, a small town in the Zanzan province; 50 protesters were rounded up on 21 September 2022.
- Some 115 individuals were arrested in Urmia in October 2022.
- Some 60 individuals were arrested in Malikendi.

We have worked hard to document a record of these victims as much as possible and the account given in Section 3, is our best endeavour with the following summary:

- The Iranian government has at least been prosecuting more than 3,000 individuals and probably up to 6,000-10,000 individuals in Azerbaijani provinces.
- Our reported ballpark figures indicated some 3000 Azerbaijani individuals describes the initial stages.
- We have compiled nearly 761 names in the Report, see Section 1 for their summary.
- The protests cover more than 30 Azerbaijani cities and towns.

The disinformation and misinformation machinery of racism in Iran operate in every conceivable way. Throughout each period of turmoil, we hear that Azerbaijani cities are quiet and in this way, they imply that Azerbaijanis are pro-government and in this way they wage hatred against Azerbaijanis. Of course, these are targeted and highly charged accusations to divert the attention from militarised and tense conditions normally superimposed over Tabriz, Zanzan, Urmia and Ardabil. However, the fact-base presented in the Report is strong enough to expose such false accusations and reject them as propaganda.

It is also noteworthy to mention that Azerbaijani Turks make up the overwhelming majority population of West Azerbaijan province, East Azerbaijan province, Zanzan province, Hamadan province and Ardabil province. Azerbaijanis are also in majority in a number of other provinces or regions such as

---

Karaj and Qazvin provinces. In Tehran alone, the best estimate is that its populations is 40% of Azerbaijani. There are also other Azerbaijanis living in central provinces as ethnic minorities or internally dispersed people. They collectively make up approx. 35 million and 1/3 of the total population in Iran and nearly the same size as the Persians.

### 3. Evidence base for Human Rights Violation of Azerbaijanis by the Islamic Republic of Iran during Protests against Mandatory Hijab

The authorities called her “As a corrupt person on the Earth.” She is accused of killing a policeman. This was enough to assume that her life was in danger; she was tortured to confess to the dictated terms of killing a security agent; else her daughter would be arrested too. She was first condemned to 25 years of imprisonment but due to the international campaign, this was reduced to 5-years of imprisonment while banished to Mashhad.
3. Hamid Qara-Hasanlu (حمید قره حسنلو): An expert on experimental science, was arrested on 4 November 2022, after the commemoration of Miss Hadis Najafi 40<sup>th</sup> day of the death in Karaj when 10 security agents raided his house, beat him in front of her 10 years old daughter and arrested him together with his wife (see above). The authorities called him “As a corrupt person on the Earth.” He was accused of killing a policeman. 10 days later, he was taken to hospital for emergency treatment, as apparently his ribs were broken under torture. This was enough to assume that his life is in danger. He was first condemned to capital punishment by execution but due to the international campaign, this was reduced to 15-years of imprisonment while banished to Yazd.
